A year ago, when Koerner was walk ing by a little stream above the springs, he noticed a large rainbow trout feebly

wiggling.
Now, John had rheumatism and he devined the cause of the fish's limp. He reached for the creature, which, seeing Koerner a friend in need, allowed it-

self to be caught.

John took the fish to the hotel and put it in one of the springs, and when in a few weeks it became alive and spry he turned it loose in the stream again, first marking it with a piece of silver wire. This year when John Went to West Baden again he walked by the stream. He suddenly heard several splashes and some water fell on his shoe. There was his trout. It had recognized its benefactor. Well and spry as ever, the fish leaped about to show its good condition, doing this every day when John appeared for his daily walk.

> The finest contour of a female face, the sweetest amile of a female mouth, leacs something if the head is crowned with scant hair. Scant and falling hair, it is now known, is caused by a parasite that burrows into the scalp to the root of the hair, where it saps the vitality. The fittie white scales the germ throws up in burrowing are called dandruff. To cure dandruff permanently, then, and to stop falling hair, that germ must be killed. Newbro's Herpicide, an entirely new re-mit of the chemical inheratory, destroys the dandruff germ, and, of course, stops the falling hair, and prevents baldness. Sold by leading druggists.
